

Dear Interviewer,

I am writing to provide a reference for Lau Zi Long Louis, who is currently applying for admission into the Diploma in Big Data & Analytics at Temasek Polytechnic. As Louis's form teacher from Secondary 1 through Secondary 4, I have had the opportunity to oversee his academic progress and personal development throughout his entire secondary school education. This four-year relationship has allowed me to observe his character, daily habits, and academic inclinations within the classroom environment, giving me a clear understanding of his general capabilities and suitability for tertiary education.

Throughout his time with the school, Louis has consistently demonstrated a responsible and organized approach to his academic work such as organizing content into easy-to-read revision notes. In terms of his specific aptitude, Louis shows a notable carefulness when handling numbers, frequently taking the extra step to check for the validity of his data before final submission. He appears to genuinely enjoy analyzing information, often looking to identify underlying patterns and trends to guide his choices before making a final decision. Additionally, Louis has proven to be highly adaptable when it comes to utilizing various ICT tools, displaying a steady capacity to learn and integrate new digital platforms. This was evident when he planned and led class activities in his role as a Senior Peer Support Leader.

Looking ahead, Louis's foundational interest in data and his methodical habits suggest that he is well-prepared to take on the structured curriculum of the Big Data & Analytics course. The analytical and technological nature of your program aligns well with the academic qualities he has developed during his secondary school years. Given the qualities he exhibits, he has the necessary potential to adapt to the academic demands at Temasek Polytechnic. I believe this course will provide him with the appropriate platform to further refine his skills, and I wish him all the best in his future academic pursuits.

Yours sincerely,

Mr Teng Jun Boon

Teacher

Beatty Secondary School
